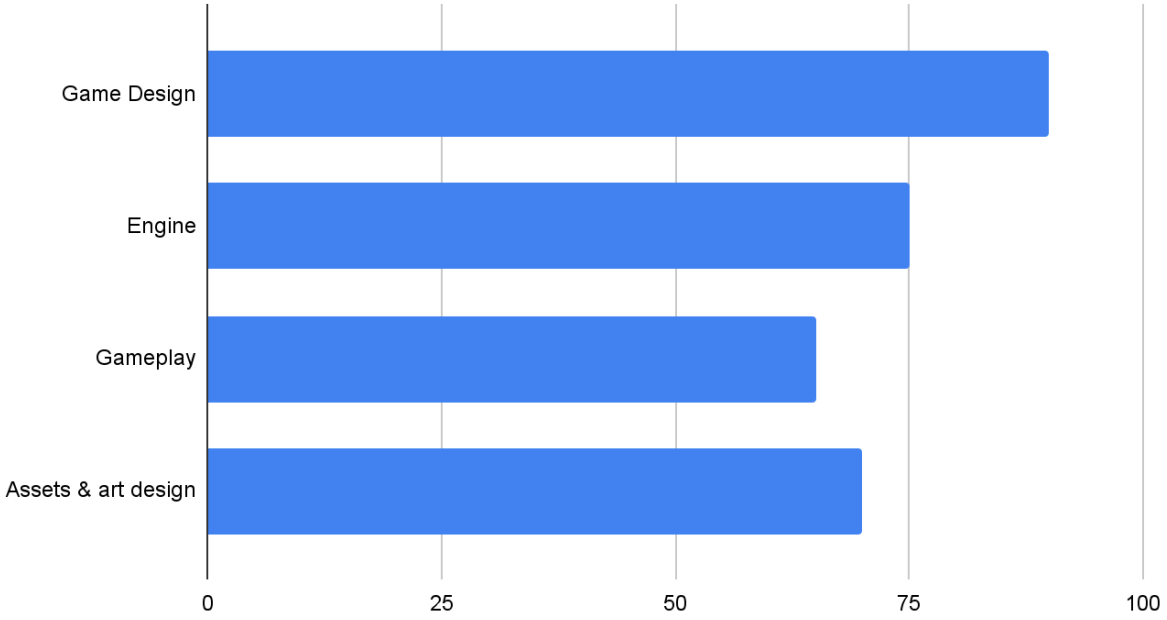
Just one more

Report 2

Team 1: Tomáš Adamec, Jan Brabec, Julie Dvořáková, Jan Červenka



Project state

Game Design

Game design is almost done. We are currently polishing some final flaws and focusing on finishing.

Engine

Most of the game core is implemented. Games can be started and go through the main menu to weapon choice, to the game and then win it. Most work past weeks was on polishing weapons , new casino minigame and adding challenging run modifications.

Gameplay

At the start of the game the player can choose from three weapons and run modifications. Then proceeds to the game where he immediately starts to play. He goes through 3 levels(maps) and in each level upon completing moves to the next one using the elevator. When he finishes the last level victory screen appears, he can check his time and the best time. When dying there is a death screen and there is a pause menu when pressing the binded key. Player can go to casino and either play one of the minigames or buy upgrades from shop. Also all player mechanic from before are fully working.

Assets & art design

Most of the assets and art are finished. Office and bathroom levels have all assets and backgrounds, the boss office level is almost finished. Animations for the pencil weapon and office enemies have been implemented.

First look from player prospective

Some of the latest art

Work done

Tomáš Adamec - 100,5h (+20)

- game design, gameloop implementation, player implementation, enemies logic, camera setup, save/load implementation, game scene setup, proof of concept, enemies spawn logic, concept arts

+ Challenging runs implementation, menus logic, data saving.

Jan Brabec - 59h (+19)

- game design, casino and gambling minigame concept and design, betting logic, shop implementation, minigame logic and score system

+ New casino minigame (blackjack), casino design

Julie Dvořáková - 107h (+35)

- character, enemy, and environment design, sprite animations, animation implementation in unity, HUD elements design

+ Assets and map design, enemy animations

Jan Červenka - 27h (+7)

- game design, weapon design, logic and implementation

+ Sword hit detection, blackjack dealer concept art

Work to do

Game Design

Main goals
- Menus design

Side goals
- audio
- tutorial

Engine

- changeable settings for the user
- tutorial
- improving save logic for data

Gameplay

- Improve playability and feel of controls and playing
- improving level layout
- side content like achievements, etc…

Assets & art design

- Animations for enemies
- Menus design
- HUD concept finalization
- Cut scenes between levels
